

Thick Film Hybrid Large Power military DC/DC Converters

(HOL28S Series)

1 Features of military DC/DC Converters HOL28S Series

- High reliability
- Input voltage range : 16V ~ 40V , Typical
DC input voltage: 28V
- Output power PO : 66W ~ 120W
- Operating temperature range T_c : -55°C ~ +125°C
- Low Start-up current
- No output overshoot
- Inhibit function
- under-voltage and short circuit protection
- Output short circuit and over-current protection
- Output voltage fine tunable
- Output sensing function
- Maximum power density : 100W/in³
- Efficiency 92%
- Hermetically sealed metal cases

Size :
76.70*38.60*10.66mm³

2 Scope of of military DC/DC Converters HOL28S Series application

High-reliability electronic system for aviation and aerospace, weapon and ships etc.

3 Description of military DC/DC Converters HOL28S Series

This series products are high reliable hybrid thick film large power DC/DC converters. By using half-bridge circuit topology and pulse width modulation principle, the output sampling voltage isolated by opto coupler to modulate the pulse width and form the closed-loop control to make the product a stable voltage output. This series products are made by thick film hybrid integrated process, hermetically sealed metal cases. Product Web : www.ecrimpower.com E-mail: sales@ecrim.cn Phone: +86 551-63667943 Fax: +86 551-65743191 - 1 -

design and manufacturing meets MIL-PRF-38534 requirements. Customers can connect the matching power EMI filters in the input port to improve the product's electromagnetic compatibility.

4 Electrical performance of military DC/DC Converters HOL28S Series

Tabel2 Rated conditions and recommended operating conditions

Absolute Max. Rated value	
Output voltage : 15.5V ~ 41V	Mechanical Shock : 1500g
Output power : 120W	Lead resistance to welding temperature : 300°C (15s)
Storage temperature : -65°C ~ 150°C	Weight : 100g
	ESD : 2000V

Table 3 Electric characteristics

No.	Parameter	Conditions (Unless other wise , - 55°C≤T _c ≤125°C , V _{IN} =28V±5%)	HOL28S5		HOL28S6R3		HOL28S9R5

11 Ordering Information of military DC/DC Converters

HOL28SSeries

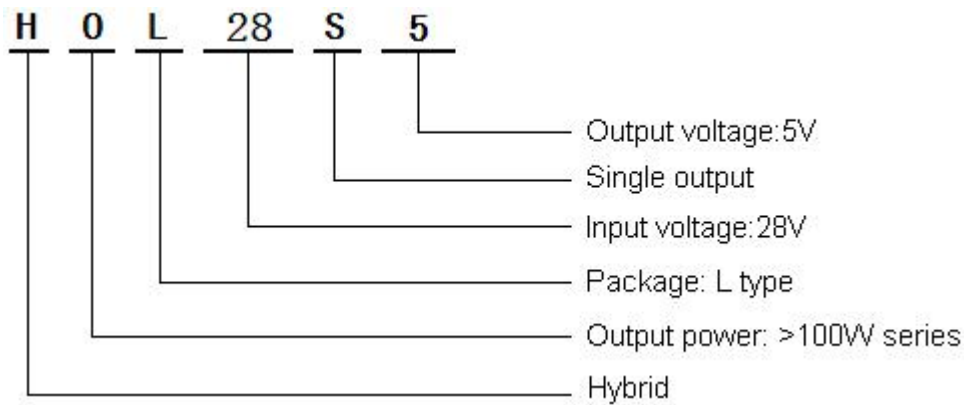

Fig 13 Part Numbering Key

Part Numbering Key

- ☆ Both positive and negative terminals for power supply shall be correctly connected when power is applied so as to avoid permanent damage to the device.
- ☆ Testing position shall be the root of the pin of the device when the electrical characteristic is measured.
- ☆ The baseplate of the device shall be closely attached to the circuit board during device mounting so as to avoid the damage on pins. The shockproof actions shall be adopted when necessary.
- ☆ Pins shall not be bended to avoid the glass insulator cracking and case leaking.
- ☆ Pins at inhibit terminal shall be hung in the air during no operation.
- ☆ When ordering this device , the detail electrical specification shall be based on relevant standards. While data offered in this document shall be for reference only.
